Case Study
SIMcontrol Platform
POS, Fintech & Retail

SIM
CONTROL

Industry

Technology has changed the retail industry to create a situation that both affects the retailer and consumer. Today's point of sale has multiple devices that need to be connected to reliable mobile data connections. Reliability is critical as it has a direct effect on operations. Furthermore, LTE store backup connectivity is critical as afail-over for primare store connectivity.
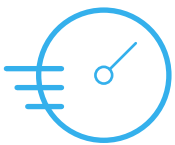

Applications

POS Systems

Card Terminals & Airtime Vending

Online Order App Devices

Handheld App Devices

LTE Store Failover

Solution

SIMcontrol is the easiest way to deploy and manage SIM cards in POS and Retail applications using a single online platform.

Cost-Effective

Managing your spend on SIM deployments is key. Our platform eliminates the risk of SIM abuse and reduces data connectivity costs.

Quick & Easy

Try it out today with existing SIM cards. We also supply SIMs in bulk and take care of the RICA and provisioning hassle.

Reliable

SIMcontrol has over 10 years of proven success. Partner with us for your SIM management and get access to fast turnaround on technical support queries.

Multi-Network

We are mobile network agnostic - choose SIMs from any mobile network to ensure coverage for your project. We also offer local services in numerous African countries, or use our Global Roaming solutions for cross-border connectivity or dual-network SIMs.

Requirements

Reliable connectivity

Risk Management

Easy SIM management at scale

Multi-Network options

Positive Results

Managing SIMs in POS and retail applications is critical for operational success. SIMcontrol makes it easy and cost-effective. Our platforms helps retail technology companies across Africa to reduce the hassle and cost of managing device SIMs at scale.
