

Next Generation **SIM Management Solutions**

Easily monitor and manage company SIM cards on our proven online platform.

SIMcontrol is built for business. It's the easiest way to manage large numbers of business SIM cards on a single pooled account. SIMcontrol is designed for reliable M2M, IoT and data device deployments and works with existing SIMs from all major mobile operators.

Join hundreds of leading companies who use SIMcontrol to easily connect all their mobile data devices to the internet cost-effectively, reliably and quickly.

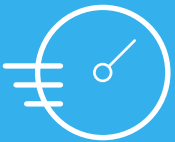

Why SIMcontrol?

SIMcontrol is a tried and tested platform with more than 10 years of proven success for our customers.

Cost-Effective

Our see-what-you-spend approach eliminates the risk of SIM abuse and reduces data connectivity costs. No contracts and no volume commitments means you only pay for what you need.

Quick

Get started fast. Try it out today with existing SIM cards or order from us for quick delivery. We take care of the RICA and provisioning hassles.

Stay in Control

Managing all your SIMs in one place makes SIM administration a breeze. Automate most of your SIM management activities and free up precious time.

Value-Added Services

SIMcontrol is built on core mobile network infrastructure to ensure maximum reliability. Unique add-ons include location services, data session history, device setup SMS's, SIM profile lookups, advanced API and legendary technical support that understands M2M & IoT connectivity issues.

How does it work?

Take control of your data SIM fleet by managing all your SIMs on one single online platform.

Set up custom SIM-level spend limits.

SIMcontrol monitors your SIMs and ensures you only spend as much as you plan to.

POWERED BY

Leaders in African IoT connectivity

Telco's can be hard to deal with. With over 10 years of experience the Flickswitch team has become the experts in assisting companies across the continent to find the best solution to their device connectivity challenges.

Being network agnostic means you can choose between several mobile data offerings to find the best solution for your specific requirements. We manage SIMs for hundreds of companies ranging from M2M, IoT, Fintech & POS, Security, Agritech, Retail and many other mobile data applications.

Prepaid, APN or Roaming – we manage them all.
