SIM CONTROL

Mobile Data Connectivity Platform

Easily manage company SIM cards

With the rapidly growing demand for connectivity, businesses are facing the challenge of ensuring smooth managing and monitoring large amounts of SIM cards. Being able to easily manage data SIM cards from various mobile networks is essential for reliable mobile data connectivity.

**All networks.
One platform.**

API for easy integration

No-long term contracts

What is SIMcontrol?

SIMcontrol is an alternative to dealing with mobile networks directly. We offer a range of mobile SIM options from all leading networks, including unique features not available directly from mobile networks. SIMcontrol is an online SIM management platform that supports various SIM package types.

SIMcontrol is a SIM type agnostic, online SIM management platform for businesses where reliable mobile network connectivity is critical. It is ideal for IoT and various data device deployments in verticals such as retail, energy, utilities, fintech, logistics, security, and employee connectivity.

SIMcontrol gives companies total control and flexibility with a unified, secure and compliant mobile connectivity platform - offered as an online SIM management solution.

Why SIMcontrol?

There is not one single SIM that is suitable for every application. We have the experience to advise on different data SIM options. SIMcontrol is a tried and tested platform with proven success for our customers.

Be in control
With our easy to use, online SIM management platform you can manage all your SIMs from various networks in one place.

Limit your mobile spend
Eliminate the risk of SIM abuse, save on data and SIM management costs by capping your costs on the SIM level. Never experience bill shock again.

Cost-effective
Our see-what-you-spend approach eliminates the risk of SIM abuse and reduces data connectivity costs. No contracts and no long-term volume commitments mean you only pay for what you need.

Quick and Easy
We assist with SIM card supply, provisioning and activation. Pay only for what you need, ; when you need it.

Reliable support and maintenance
With our technical team specialized in telco, we quickly identify your problem and provide you with assistance you need.

|Our Solutions

Every device deployment is different. Let us help you choose the best SIM option for your needs including our unique Business Prepaid service, Business Contracts, Managed APN or Global Roaming options.

Business Prepaid

- Automated SIM balance monitoring
- Automated data or airtime recharges
- Deploy quickly and easily (no contracts)
- Ideal for M2M, IoT or mobile data devices
- Competitive data rates
- Reliable Public APN

Business Contract

- Automated SIM balance monitoring
- Automated recharges for Top-Up & Contract SIMs
- Cost-effective large data usage options
- Reliable Public APN

Managed APN

- Fully managed APN-as-a-Service
- Pooled Data across Vodacom and MTN (single pool)
- SIM-level quota monitoring and data limits
- New-generation Cloud Networking
- Custom firewalling and data routing
- SIM IP & Radius Management (with fixed IP's)
- No long-term APN service contracts
- Competitive APN data pricing
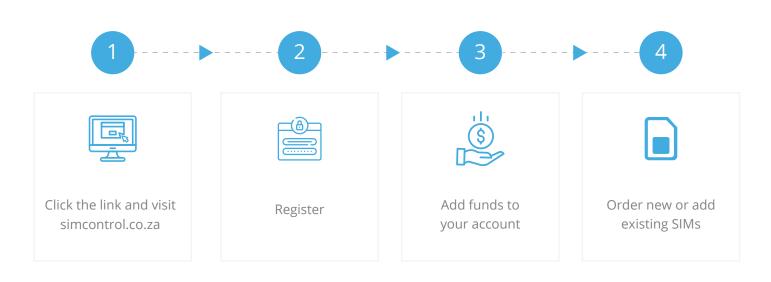

Global Roaming

- Single SIMs with global reach
- Dual network in most countries
- Built for IoT and optimized for African or global roaming
- Competitive data roaming rates for African countries
- No long-term contracts
- SIM-level usage monitoring and data limits
- Custom networking, security and firewalling options

Features

Manage different SIM types from all major networks on a single online platform

Secure self-help platform

Built for scale & IoT-friendly

SIM-level control & no bill shock

Experienced Technical Support

No long term contracts & cost effective

Bulk SIM supply

SIMcontrol API for easy system integration

Multiple user control & detailed logs

Advanced online reporting & insights
