SIMcontrol Platform
Courier & Distribution

SIM
CONTROL

Industry

With today's demanding need for quick & personalised service, mobile devices are being deployed at a growing rate in the courier and distribution ecosystem. Also, as IoT becomes more widely accepted, more and more devices, sensors and people are being monitored in real time, opening up countless possibilities for those that choose to board this growing trend.

Applications

- Track & Trace
- Handheld Devices & ePOD's
- Asset Tracking
- Real-Time Route Planning

Solution

SIMcontrol is the easiest way to deploy and manage high-risk SIM cards in courier & distribution applications using a single online platform.

Cost-Effective

Managing your spend and risk on SIM deployments is key. Our platform eliminates the risk of SIM abuse and reduces data connectivity costs.

Quick & Easy

Try it out today with existing SIM cards. We also supply SIMs in bulk and take care of the RICA and provisioning hassle.

Reliable

SIMcontrol has over 10 years of proven success. Partner with us for your SIM management and get access to fast turnaround on technical support queries.

Multi-Network

We are mobile network agnostic - choose SIMs from any mobile network that best suits your deployment. We also offer local services in numerous African countries, or use our Global Roaming solutions for cross-border connectivity.

Requirements

- Easy SIM management at scale
- Network coverage in remote areas
- Quality Data
- Risk Management

Positive Results

Managing SIMs in high-risk data devices deployed in the field can be hard. SIMcontrol makes it easy and cost-effective. Our platform helps courier & distribution technology companies across Africa to reduce the hassle and cost of managing device SIMs at scale.
